

Servicing Your Spa

Please read and follow the instructions on the label of all chemical containers

Proper Ranges

| | |
|------------|--------------|
| pH | 7.2 - 7.8 |
| Alkalinity | 80 – 120 ppm |
| Bromine | 2 - 5 ppm |
| Calcium | 60 ppm |

Quarterly

- Refill Floater with Bromine Tablets
- Drain, Clean and Refill Spa
- Chemically clean filters
- Add ¼ cup baking soda per 500 gal to raise alkalinity and ph. Run spa for 15 minutes. Test spa and adjust if needed.
- Add calcium increaser per label directions to raise water 20 – 40 ppm
- Shock with Spa Bromine granules per label directions

Monthly

- Remove and rinse filters
- Shock with Spa Bromine granules per label directions
- Refill floating dispenser
- Test and adjust pH and alkalinity

Weekly

- Test and adjust pH and Alkalinity
- Refill floating dispenser
- Shock with non-chlorine spa shock (potassium monopersulfate) per label

Before each use

- Test and adjust spa if needed
