

Servicing Your Spa

Please read and follow the instructions on the label of all chemical containers

Proper Ranges

pH	7.2 - 7.8
Alkalinity	80 – 120 ppm
Chlorine	0.5 ppm
Calcium	60 ppm

Quarterly

- Replace Nature 2 Cartridge
- Drain, Clean and Refill Spa
- Chemically clean filters
- Add ¼ cup baking soda per 500 gal to raise alkalinity and ph. Run spa for 15 minutes. Test spa and adjust if needed.
- Add calcium increaser per label directions to raise water 20 – 40 ppm

Monthly

- Remove and rinse filters
- Shock with Spa chlorine granules (Sodium Dichloride)
- Test and adjust pH and alkalinity

Weekly

- Test and adjust ph and Alkalinity
- Shock with non-chlorine spa shock (potassium monopersulfate)

Before each use

- Test spa
- Shock with non-chlorine spa shock (potassium monopersulfate)
